

Industrial Control Systems Complete Packages

- ◆ Programmable controllers
- ◆ Touch screen or PC interface
- ◆ Custom design & build

We provide complete control solutions for your industrial applications!

- ◆ **fully automated controls**
includes computer and programmable controller
- ◆ **integrates with existing systems**
communicates with Modbus, OPC, RS232, etc.
- ◆ **data collection and handling**
input data directly from manufacturing to office

The control package can be applied to one specific process or to an entire plant. All processes can be monitored from one central station via an ethernet network. The control package can incorporate a wide variety of controls, both digital (on/off signals) and analog (variable signals).
